DETAILED ACTION

Response to Arguments

Applicant's arguments filed 5-26-05 have been fully considered but they are not persuasive.

1. The primary examiner has reviewed the applicant's amendment/arguments, along with the amended claims from the co-pending application (now patent). His position is that the previous nonstatutory double patenting rejection is still correct and will be upheld in this Final Office action.

2. This application, 10/005560 and copending application 10/005650 disclose limitations that, while not identical, are not patently distinct from each other. The examiner's previous listing of claims has been modified, due to the claim amendments to 10/005650, but the overall teachings/disclosures found in the both sets of independent claims requires a terminal disclaimer in the primary examiner's opinion for allowance.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-26 provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-15 of copending Application No. 10-005506. Although the conflicting claims are not identical, they are not patentably distinct from each other because both cases deal with methods for use in a wireless system communicated between at least one or more base stations to respective terminals using a compensation scheme (eg. dirty paper coding) to compensate for interference among (uplink/downlink) signals. Furthermore, one skilled can see that the claims recite similar language for the dependent claims as well:

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

1. The examiner invites the applicant to send in a completed terminal disclaimer such that both applications can be allowed.

2. Based on the co-pending application's rejection (which contained objected-to material) claims 4-5 and 7-13 are objected-to while claims 14-26 are allowed. An amendment should be sent modifying the claims per this recommendation (with the terminal disclaimer).
